

SUBSEA PIPELINE SYSTEMS

Piggable Wye

Piggable Wye

Oil States' **Piggable Wye** is a Y-shaped fitting for shallow and deepwater subsea pipeline applications that permits pigging and cleaning of lateral lines.

Designs are available in both symmetrical and asymmetrical configurations for various pipeline applications. Both designs readily accept all standard pipeline pigs including cup and disc for pipe cleaning and the longer intelligent pigs.

Wyes come standard with blanked ends and weld prep bevel for customer versatility. Options are available for welded pup ends (WE x WE x WE) or flanged ends per customer requirements.

SUBSEA PIPELINE SYSTEMS

Piggable Wye

Key Benefits

- Available in symmetrical or asymmetrical designs to accommodate specific pipeline configurations.
- Utilizes a thirty-degree angle of entry to ensure a smooth transition for the pig without the risk of hanging up.
- Manufactured from a single-body forging or casting to ensure consistency of materials and workmanship.
- Standard weld ends can be provided with additional configurations upon request.
- ANSI pressure Class 300 to 2500, API 6A ratings 2000 to 10000, ASME compliant design.

Applications

- Pipeline pigging operations – shallow and deepwater, ROV or diver assist

Services

- Engineering design
- Testing – FAT, SIT design qualification
- Coatings
- Installation technical assistance

About Oil States' Subsea Pipeline Systems

Oil States' Houston-based Subsea Pipelines Systems division designs, manufactures and markets proprietary deep and shallow water pipeline connectors for subsea pipeline construction, repair and expansion projects.
