

High Specification Services

Mission-Critical weld overlay and machining

Montgomery Machine Company (MMC) is a sub-contract supplier of precision machining services and weld overlay cladding services. Located in Houston, TX., with close proximity to the Houston Ship Channel, MMC has been supplying high specification parts to the Oil & Gas, Power Generation, Paper, Marine and Renewable Energy markets since 1975.

With 60 full time employees, MMC has built a reputation on producing first class quality products that exceed customer expectations. All operations are handled from the 63,000 square foot, climate controlled technology center in Houston. Proximity of the facility gives easy access to Oil States Industries Jacinto Port facility with floor to barge load out capabilities.

Machining services can accommodate parts up to 12 feet and weighing up to 20 tons. The majority of machining operations are handled via CAD/CAM programming and the latest CNC machines equipped for complex manufacturing geometries. This ensures a high level of consistency across operations and provides an even higher level of quality.

MMC offers the unique ability to machine parts for mission critical operations and then weld overlay or cladd those components to supply a complete package. This saves time and money while eliminating the headaches associated with multiple vendor management. It also ensures the part is right from start to finish with no finger-pointing by vendors.

Montgomery's advanced weld overlay system operates under procedures devised to meet today's optimum quality and metallurgical standards. These procedures are backed by exhaustive destructive and performance testing to comply with industry standards. Weld overlay materials include 300, 400 and Duplex Stainless Steels, High Nickel Alloys such as 625, 725, 825, Hastalloy and some cobalt based materials.

At Montgomery Machine Company, quality is at the forefront of our business and compliance with the ISO 9001-2008 Quality system forms the foundation of this effort. A commitment to quality ensures our customers that all products and services consistently meet their expectations. Montgomery has been ISO certified since 1994 and is currently certified to the latest ISO 9001-2008 standard.
